Reavell 5437

PROVIDING PEACE OF MIND, INCREASED RUNNING EFFICIENCY, AND LIFETIME VALUE

Protect Your Investment with Reavell

PERFECT WITH PRESSURE

Building on a 120 year heritage, Reavell continues to maintain its position at the leading edge of compressed air technology. The engineers behind the first Scott-Reavell steam engine, patented in 1894, probably wouldn't recognise our current high pressure compressor range, but they would certainly identify with our relentless drive for technical excellence and quality customer service.

As part of the global Gardner Denver High Pressure Division, Reavell continually invests in research and development, with the goal of continuously maximising uptime and lowering operating costs.

Our unique compressor solutions are designed to offer market leading, maximum output with minimum size and weight. They deliver unrivalled performance and peace of mind for customers operating in some of the world's most demanding environments - at sea, on land and underground.

REAVELL COMPRESSORS REPRESENT A SIGNIFICANT INVESTMENT FOR YOUR BUSINESS. OUR PEACE OF MIND APPROACH, INCREASED RUNNING EFFICIENCY, AND LIFETIME VALUE MAKES US YOUR PERFECT AFTERMARKET PARTNER.

PROVIDING PEACE OF MIND

Reavell is committed to actively supporting its solutions throughout their lifetimes - whether that's through routine maintenance kits, life extending scheduled factory refurbishments or immediate support whenever required. We pride ourselves on providing you with lifetime value.

Our service kits are tailor made to your compressors, and provide genuine Reavell parts - peace of mind that you will have the right parts you need, when you need them. When the time to carry out your service comes, the Reavell design allows easy access for maintenance, and our market leading service times ensure downtime is kept to an absolute minimum.

At Reavell we emphasise lifetime value. Our state of the art refurbishment centre is uniquely positioned to extend the life of your machine, providing continuous support for up to 30 years. When it comes to protecting your investment - rest assured, Reavell can handle the pressure.

SERVICE YOUR INVESTMENT

REGULAR SERVICING PROVIDES YOU WITH THE PEACE OF MIND THAT YOUR MACHINES WILL CONTINUE TO RUN EFFICIENTLY AND DELIVER THE CRITICAL OUTPUT THAT YOU REQUIRE. REAVELL SERVICE KITS ARE PROVEN TO PROLONG THE LIFETIME OF YOUR MACHINE.

MAXIMISING YOUR EFFICIENCY

Servicing intervals vary depending on the application and site conditions and have been optimised to maximise the efficiency of wearable parts, while minimising the risk of downtime to your machines.

wearing parts and ensuring the running efficiency of your investment.

Below is an example of some of our popular compressor blocks and their recommended service intervals.

Run times between each service have been determined by the Reavell engineering team, with the aim of maximising the lifetime of

RUNNING HOURS/ SERVICE KIT

OPTIMISED SERVICE KITS

From nitrogen boosting to air engine start, every Reavell compressor has its own set of service requirements. Reavell service kits provide all the necessary components to enable you to carry out field services and repairs efficiently.

We can guarantee that while each machine's service requirements may vary, our service kits uphold the same quality and reliability standards that you can expect from any Reavell compressor. Each kit contains 100% verified Reavell parts, which will maintain your warranty, and delivers peace of mind to our partners in business.

Reavell 5460

VALUE YOUR INVESTMENT

BESPOKE SERVICE OPTIONS

At Reavell we realise your application is unique, with your own challenges and specifications. We pride ourselves on understanding the complex solutions your customers require, and custom build bespoke machines, tailored direct to your specific requirements. We can ensure a full range of aftermarket solutions, including service kits and parts, all tailored to your specific compressor.

Reavell 5470

GENUINE PARTS

Reavell is the only source for parts that fulfill the stringent manufacturing standards needed to ensure uninterrupted equipment performance and to maintain your warranty.

Our parts are designed and manufactured to the highest standards to guarantee optimum performance and life span efficiencies.

When it comes to high pressure compressors, safety is paramount. With genuine spare parts, your Reavell machine will not only run at maximum efficiency, but also be safe for your personnel and plant. Ensure that you have peace of mind when it comes to the running efficiency of your machine, with Reavell genuine parts.

PRESERVE YOUR INVESTMENT

LEGACY

Every new purchase represents a significant investment and we recognise that for some customers, it may not always be financially viable to replace an older machine with a newer, more efficient model.

That's why at Reavell we proactively work with you during the lifetime of your compressors to ensure we can support your new and old machines.

Contact your local sales representative to find out if your compressor is supported.

WARRANTY

Reavell's compressors have been designed to provide many years of trouble free service. However, even the most reliable products require regular servicing and maintenance. That is why we provide a 12 month manufacturer's warranty, as standard. Bespoke extended warranty plans are available and can be discussed at point of sale.

Our aim is to offer complete peace of mind for your compressor operations, and to eliminate the risk of any unforeseen costs, so that you can focus your attention and any future investment on your plant and operations.

MAXIMISE YOUR INVESTMENT

REFURBISHMENT

Depending on the planned lifetime of your systems, replacing compressor units is not always a viable option. That's where our high pressure refurbishment centre comes into its own. It is the only major high pressure refurbishment centre in the United Kingdom and it has supported customers across industry for many decades.

Our Centre of Excellence enables us to offer full diagnostic evaluations and can also recommend maintenance programs, designed to bring your existing high pressure system back to its optimum operating performance level. With a dedicated team to deal with your refurbishment requirements, Reavell are uniquely positioned to add extended lifetime onto your compressor.

REAVELL TRAINING DAYS

At Reavell we're proud of our products - and proud to share our expertise!

We offer a comprehensive range of factory training days. Our courses cover everything from important health and safety requirements and aftermarket basics, to in-depth machine maintenance training.

We can also design a bespoke training course to meet your specific requirements. So whether it's sales training centred on technical features and USPs or hands-on maintenance training for your engineers, we can deliver the course you need.

Our training courses can be delivered at our Centre of Excellence. Alternatively we can deliver bespoke training at a location and venue to suit you.

To find out more about our training courses, or to book a course, speak to your local Reavell sales representative.

GLOBAL PRESENCE

In addition to our UK based service engineers, we have a global footprint. Wherever you are in the world, Reavell's dedicated service engineers are available to you.

Our engineers are trained on site at the Centre, where they undergo comprehensive training to ensure that each engineer meets the exemplary quality standards that Reavell demands.

Responsiveness is key to us, we understand the urgency to keep your machines operational and running at peak efficiency, so we guarantee a swift response to any issues you may have.
