“We keep you moving” is more than just a strap line, it’s our promise.

Global Presence - Local Service

Gardner Denver Transport and the brands it represents, are part of a world-renowned brand portfolio, offering a global, single source transport compressor solution that makes a real difference. Our customers rely on us to keep their systems operating cost-effectively and at optimum performance. Our reputation for excellent service and support extends across the globe.

“We keep you moving” is more than just a strap line, it’s our promise. If you break down, we’ll get you into one of our dedicated local service centres and back on the road as soon as possible.

These dedicated service Centre’s, along with a fleet of Gardner Denver mobile service engineers, provide total peace of mind. Offering a rapid turnaround, the service Centre’s and mobile fleet, with their intelligent stocking policies, carry a full inventory of routine service parts along with maintenance, repair parts and lubricants, covering all Gardner Denver Transport products and systems.

Furthermore, at many locations we deliver bespoke customer training, either onsite or at your local service Centre, providing both hands on experience in Gardner Denver system operations, and valuable training for your own service engineers.

Gardner Denver Genuine Spare Parts

Only genuine spare parts and lubricants are specifically designed to guarantee the highest standards of reliability, optimum efficiency and performance of Gardner Denver Transport solutions.

- Longer service life – even under the harshest of conditions
- Up-time increased through superior reliability
- Manufactured to the most stringent and strictest quality assurance systems

Using genuine Gardner Denver parts and lubricants will safeguard your product, maintain your warranty, and keep you moving for longer.

Change to non-genuine parts and lubricants can invalidate your warranty. The performance of your Gardner Denver product may also be adversely affected potentially resulting in a shorter lifespan and increased whole life costs.

With parts and labour such a small part of the total cost of ownership when compared to initial purchase, you owe it to yourself and your compressor to use only genuine parts and lubricants for total peace of mind.

Optimised Service Kits for Maximum Performance

Depending upon application and operating conditions, vehicle servicing intervals can vary considerably. At Gardner Denver, we've optimised our servicing intervals to maximise the life/usage of our serviceable parts, at the same time minimising the risk of downtime to your application.

Service intervals have been determined by Gardner Denver's own engineering team, to deliver maximum lifetime from serviceable parts which in turn, ensures the efficient running of your investment.

Each and every Gardner Denver Transport solution has its own set of service requirements – from Dry Bulk to Highways & Utilities, or public transport. Our service kits provide all the necessary components to enable field servicing and repairs to be carried out efficiently. While each machine's service requirements may vary, we guarantee that each service kit upholds the same quality and reliability standards that you can expect from any Gardner Denver machine.

Each service kit contains 100% verified Gardner Denver parts – to maintain your warranty **AND** deliver peace of mind to our customers.

Service Exchange Programme from Gardner Denver Transport

However well your mobile application package is looked after, at some point it may need to be refurbished or replaced completely. That's where our Service Exchange Programme kicks in.

The lifetime of our mobile pressure and vacuum units can be extended by refurbishing the unit with genuine parts. Our dedicated Service Centres are perfectly positioned to support you.

Our Service Exchange Programme is designed to keep you moving for longer!

We keep you moving

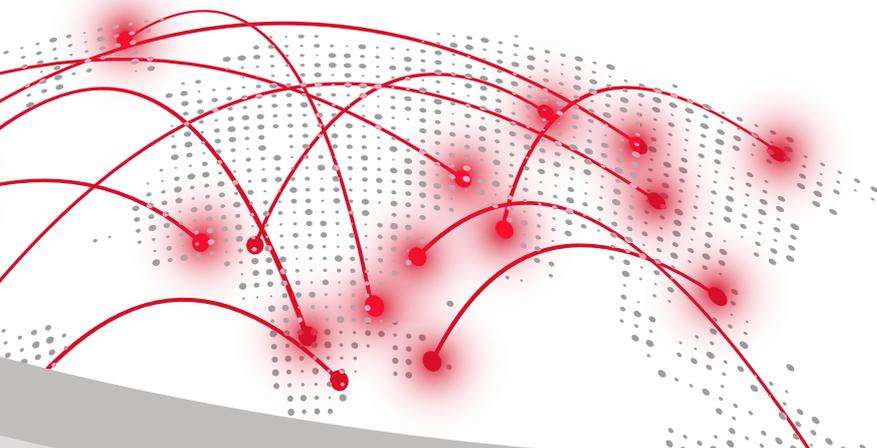

Repair & Maintenance (R&M) Contracts – we've got it covered!

Gardner Denver's R&M Contracts offer complete protection for your investment and total peace of mind for you. Not only will they reduce down time through vehicles being off the road unexpectedly, but they set standards and schedules for maintenance, repair and servicing – meaning you can relax in the knowledge that we've got it covered.

Within our Maintenance Contracts, all service parts and labour, including those for the regular annual servicing can be included. Annual calibrations (for Milk & Fuels), breakdown assistance, repairs and replacements can also be included.

The R&M Contracts from Gardner Denver protect you and your investment, allowing equipment whole life costs to be budgeted for.

Gardner Denver R&M Contracts – ***total coverage, total peace of mind, total protection.***
